Courtesy of robertsmibii over on MustangII.net, we have the following information on weight distribution:

Date 24-OCT-94

1978 Mustang II Fastback

Stock 302V8, half tank gas, no spare tire, car cleaned out...

### Weights:

Front Total: 830Kg / 1826Lbs

Rear Total: 570Kg / 1254Lbs

Grand Total: 1400Kg / 3080Lbs

### Balance:

59% front 41% rear

The Mustang II wheelbase is 96.2". The CG is located 39.2" rearward of the front suspension centerline and 56.2" forward of the rear axle centerline.

Coupes are lighter on the rear and should have an even heavier weight bias towards the front.
